Subject: Superfund Site: San Jacinto Waste Pits

Administrator Pruitt,

A belated and sincere congratulations to you on your appointment as Administrator of the Environmental Protection Agency. President Trump made a very wise decision in your appointment and I do look forward in meeting you in person soon here in Texas. As fellow Conservative Republicans, we understand the impact of the EPA to our Nation and my Great State of Texas.

I am writing you today to strongly encourage you and your agency to place a permanent armored cap on the San Jacinto Waste Pits. Attached is an Op-Ed (authored by me) recently published in local news. Additionally attached is a link to a recent interview in which I ask you to keep one thing to keep in mind: "We do not control nor can predict Mother Nature (God))."

<http://www.fox26houston.com/news/dioxin-removal-on-san-jacinto-opposed-by-some-galveston-groups>

I hope to hear from you soon. It is unfortunate that the liberal environmentalists have dominated the headlines and your time. I hope that you will give equal audience to entire Galveston Bay community before you render your decision. This issue affects Galveston Bay upstream (in the 36th Congressional District) as well as downstream (in the 14th Congressional District (my home District)). Maritime Industries and taxpayers could be greatly (and disastrously) impacted should you decide to dredge.

Respectfully, I urge you to give careful and fair consideration of the points outlined in the attached Op-Ed before rendering your decision. I would like to visit with you and your intermediaries to discuss in depth. You will find that common sense shows that a less riskier,

cost effective, and non disruptive solution to the San Jacinto Waste Pits Superfund site rests in placed an armored cap over the existing temporary cap. This the best decision for Galveston Bay, the State of Texas, and the United State of America.

God Bless You and God Bless the United States of America.

Respectfully Yours,
JT Edwards

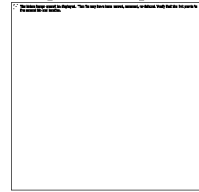

PS: I am attaching a resolution from the Republican Party of Texas regarding Superfund sites. Please add this into your consideration.
